

British Values in Computing

Democracy

In Computing we learn to understand and be considerate to the views of other online users. We understand that we are each part of the democracy of the Internet and that we can each, in our own small way, affect the way the Internet exists.

The Rule of Law

In Computing we understand the need for rules in relation to the use of different websites and apps, such as age limits for different social media platforms and games and what we are allowed to post and share. We understand that there are rules to keep others and ourselves safe and to help make the online world an enjoyable and engaging place.

Individual Liberty

In Computing we understand how to use our right to freedom of speech in a respectable and thoughtful way, being considerate of how this speech will affect others. We understand the freedom the Internet and digital devices offer us in discovering information and connecting us with the world.

Mutual Respect

In Computing we appreciate and understand the views of others, our right to challenge, question and discuss opinions and views, and to do this in a respectable and thoughtful way. We understand that as we are connected with the world while accessing the Internet, we are exposed to the widest range of views, and we are learning to respect them.

Tolerance of Those of Different Faiths and Beliefs

In Computing we understand that we are connected to people across the whole world. We understand that these are people from different communities, cultures, faiths and beliefs. We use the opportunities offered in Computing to question, challenge and understand people with these different characteristics to support and develop our tolerance of them.
